

HorseMate is an organic humate supplement for the equine sector, containing Fulvic and Humic Acids derived from ancient plant matter. Fulvic Acid is an electrolyte, which can maintain cellular balance whilst Humic Acid can maintain digestive health. Horses have been found to respond so well to natural compounds and the capacity to boost gut biology while also increasing nutrient and associated feed utilisation.

BENEFITS:

- Boosts gut biology
- Helps to increase nutrient uptake
- Maintains optimum digestive health
- Aids in the healing of mud rash
- Calming impact upon horses
- Can be fed with other feeds and supplements

DIRECTIONS FOR USE:

Include with food at the rate of 20g per 100Kg of body weight per day

NUTRITIONAL VALUES

Humic Acid 42- 48% Fulvic Acid 1.2 – 2.4%

Average mineral composition of HorseMate as tested by Canadian Humalite

ELEMENT	AMOUNT	ELEMENT	AMOUNT	ELEMENT	AMOUNT
Aluminium	0.15%	Copper	1.67ppm	Phosphorus	0.01%
Antimony	1.00ppm	Iron	0.91%	Selenium	0.63%
Barium	23.33ppm	Lanthanum	1.17ppm	Strontium	113.67ppm
Bismuth	3.33pm	Lead	1.33ppm	Sulphur	<0.5%
Boron	96.67ppm	Magnesium	0.33%	Thorium	7.67ppm
Cadmium	<1ppm	Manganese	206.67ppm	Titanium	0.01%
Calcium	0.82%	Mercury	26.67ppb	Tungsten	<1ppm
Chlorine	0.05%	Molybdenum	<1ppm	Uranium	<1ppm
Chromium	0.67%	Nickel	2.20ppm	Vanadium	2.33ppm
Cobalt	1.67ppm	Nitrogen	1.17%	Zinc	6.00ppm

CAN BE FED SAFELY WITH OTHER FEEDS AND SUPPLEMENTS

Southern Humates for Horses.

There are several reasons why horses respond so well to substances based on ancient plant material. The most important of these factors relates to the capacity of these natural compounds to boost gut biology while also increasing nutrient uptake and associated feed utilisation.

HorseMate as Prebiotics.

Prebiotics are substances that feed and support the billions of beneficial organisms residing in the intestinal tract. Humates are known to stimulate microbial activity in the soil and it appears that they serve a similar purpose in the gut. Fulvic acid is an electrolyte, which can maintain cellular balance whilst Humic acid can maintain optimum digestive health. Humates added to feed rations can help to stabilise a horse's intestinal flora and increase gut microbial growth.

HorseMate in Nutrition.

Humic and fulvic acid are the most powerful of natural chelating agents. The trace minerals found in HourseMate are all naturally chelated, but this capacity also extends to other supplemented minerals. Southern Humates offers multi-layered benefits when added to feed supplements on a regular basis. It is an inexpensive way to nurture your horse and ensure a healthy, dynamic, resilient animal. Adding humtes to farming practices is one of the reasons why farmers who feed Southern Humates to their horse are seeing such great benefits in animal health.

HorseMate as Recovery Support.

Southern Humates offers a powerful detoxifying agent available for sick animals. The physical manifestation of disease is often a negative response to the toxins released by infectious microbes. Humates bind thses toxins which results in a dramatic reduction in toxicity .

ADD HORSE MATE TO YOUR DAILY FEED – YOUR HORSE WILL LOVE YOU FOR IT.
